DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- the species of figures 1A-1E;
- the species of figures 2A-2E;
- the species of figures 3A-3F;
- the species of figures 4A-4F; and
- the species of figures 5A-5E, respectively.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 22-29 are deemed to correspond to the species of figures 1A-1E;

Claims 30-37 are deemed to correspond to the species of figures 2A-2E;

Art Unit: 3749

Claims 38-45 are deemed to correspond to the species of figures 3A-3F;

Claims 46-48 are deemed to correspond to the species of figures 4A-4F;

Claims 49-53 are deemed to correspond to the species of figures 5A-5E.

The following claim(s) are generic:

Claims 54 and 55.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

As evidenced by US 6213759 B1 the species lack the same or corresponding special technical feature requiring a locking mechanism to move in a first direction to permit the release of a trigger which then is free to move in a direction different from that of the release mechanism.
